Who to sign in as, what to show, and what the audit log records

10
sign-ins · ~30 min

Ten sign-ins in the order of the numbered sign-in list. Do the steps in each row and every function has been shown once. The last column is what each step writes to the audit log, so the closing audit check has something to show for every person.

Before you start: open the site, choose **Group of companies** or **One company** on the first page. Same people, departments and approvals in both; the group adds company switching and Inter-company.

Signing in: pick the name in **Who are you?** and press OK — no password. Switch person with **Switch role** in the yellow banner. Finance, HR and executives in the group pick **The whole group**.

	SIGN IN AS	SHOW THESE FUNCTIONS (IN ORDER)	THE AUDIT LOG THEN RECORDS
1	**Maya Collins** Employee	**Home** · **Requests**: New Travel Request ($1,200), Credit Card Purchase (no card number), Purchase Order over $5,000 · **Time off**: 2 days · **My Time**: a 10-hour day → Banked OT at 1.5×, submit · Email & Calendar · My Pay · My Documents	"submitted Travel request TR-… → Liam Foster" · "sent Purchase order PO-… for approval (2 steps)" · "submitted their timesheet" · "2.00 h of overtime to bank — 3.00 h added"
2	**Liam Foster** Manager	**Approvals**: approve the travel, return the card purchase with a comment, approve the PO (moves to director level) · approve Maya's time off and timesheet · **My Team › Request access**	"approved … at step Manager approval" · "TR-… approved — now with Finance" · "overtime stays banked at 1.5×" · "Maya Collins may now raise requests for …"
3	**Sofia Marquez** Accountant	**Finance queue**: process the travel ($1,000 + GST + PST, attach the confirmation), record an expense claim as paid · **AP** new bill (account + department required) · **AR** Customers · **3-way match** · **Finance › PO** · **Rates & coding**: change mileage (waits for Daniel)	"processed TR-…: $1,120.00 incl. GST and PST, posted JE-…" · "recorded EC-… as paid … posted JE-…" · the bill and the rate change with old and new values
4	**Daniel Okafor** Finance Manager	Home **At a glance** · **Approvals**: approve Sofia's rate change · **Payroll › Pay runs**: open a run (banked OT is not paid twice) · **Month-end** checklist · Inter-company (group only)	the rate-change approval with old and new values · month-end steps ticked
5	**Priya Raman** HR Manager	**Hiring requests**: approve one → job posting · Onboarding · Employees · **Time & Attendance** (everyone's time off and timesheets) · **Payroll › Stat holidays**: add one · Certificates	"approved … hiring request" · "added stat holiday Boxing Day on Dec 26, 2026"
6	**Rachel Dubois** Payroll Administrator	**Pay runs**: calculate PR-2026-0019 and send it for approval · **Timesheets by pay period** · hours report · pay statements · **CRA remittances** · **Year-end**: T4 preview · Records of Employment	"calculated PR-2026-0019: gross …, net …, 0 warnings" · "sent Payroll PR-2026-0019 … for approval (1 step)"
7	**Ethan Clarke** Company Administrator	**Away rule**: approve a full day off for Liam today → Maya submits → it goes to Liam *and* Ethan, first decision counts · **Purchasing › Receiving**: receive a PO	the approval with who actually decided it · "received everything on PO-…"
8	**Grace Holloway** Executive Director	**Director level**: approve Maya's PO over $5,000 → the purchase order is ready to print · **All requests** (read only) · executive Home	"approved … at step Director level" · "PO-… approved — purchase order ready to print"
9	**Olivia Bennett** CEO	At director level: decide Chloe Nguyen's $6,200 trip (TR-2026-0013) and Sofia's $7,800 purchase order (PO-2026-0008) · approve the pay run Rachel sent · Home: Company at a glance	"approved (or declined) … at step Director level", with the comment · the pay run approval
10	**System Administrator** Super admin	**Users & access** · **Approval rules** (the $5,000 director limit) · **Email templates**: edit one line · then the **audit function** below	"changed the 'Approval needed' email" — even setting changes are recorded

The audit function — show it last, as the System Administrator

1. **Administration › Audit log**: every entry from steps 1–10 with when, who, module, action and what happened, newest first.
2. Type a name or a number (Maya, TR-…, PO-…) in the search box above the table to follow one request end to end.
3. Point out that it is **append-only**: there is no edit or delete, and financial and approval records are never deleted — only returned, declined or closed.
4. Requests, approvals, postings, payroll and setting changes are all there, including the rate change and the email wording edit.
5. Open any request (Requests › All requests): its **History** card shows the same trail for that one record, with its route.
6. **Reports › History** tells the same story in plain words; choose Just me, My team or Everyone and an area such as Time off or Pay.

If time is short: skip rows 6 and 9 — nothing later depends on them (row 9 then has no pay run to approve). Keep row 10; the audit check is what ties the demo together.

Three things to repeat: no card numbers stored · the server checks every permission · nothing financial is ever deleted, and every action is in the audit log.
