Review route — every page, every role

Sign in as these nine people in this order. Each step lists only the pages you haven't seen yet, so nothing is reviewed twice. On the first page choose **Group of companies** to see every page (the one-company setup has the same pages except Inter-company).

9 sign-ins

On each page press **Request a change** (right edge). Write it, point at the field, mark Must or Nice to have.

Home and Approvals change with every sign-in. Glance at both each time, even when the step has no new pages.

When all nine are done press **Send for review**. You'll get a page-by-page review to confirm before anything is built.
