One place for HR, requests and approvals

DEMO ERP: enterprise resource planning software, shaped to your organization

Briefing for Nisla Naay · November 2026

Prepared by Andalib Olee

The system in one minute

One system where staff fill in timesheets, ask for time off, send requests and track tasks, and where every approval is recorded automatically. Nisla Naay chooses the modules it needs.

HR
Timesheets, time off, payroll, reviews, certificates, benefits and pension

Requests
Travel, card purchases, claims and purchase orders, with attachments

Team
My Team and tasks: assign, track and report progress

Operations
Purchasing, stock, projects and contracts

Finance
Can be completely customized to your finance team's needs

≈ 478 h
of admin time a year for 50 staff, for everything on slide 14

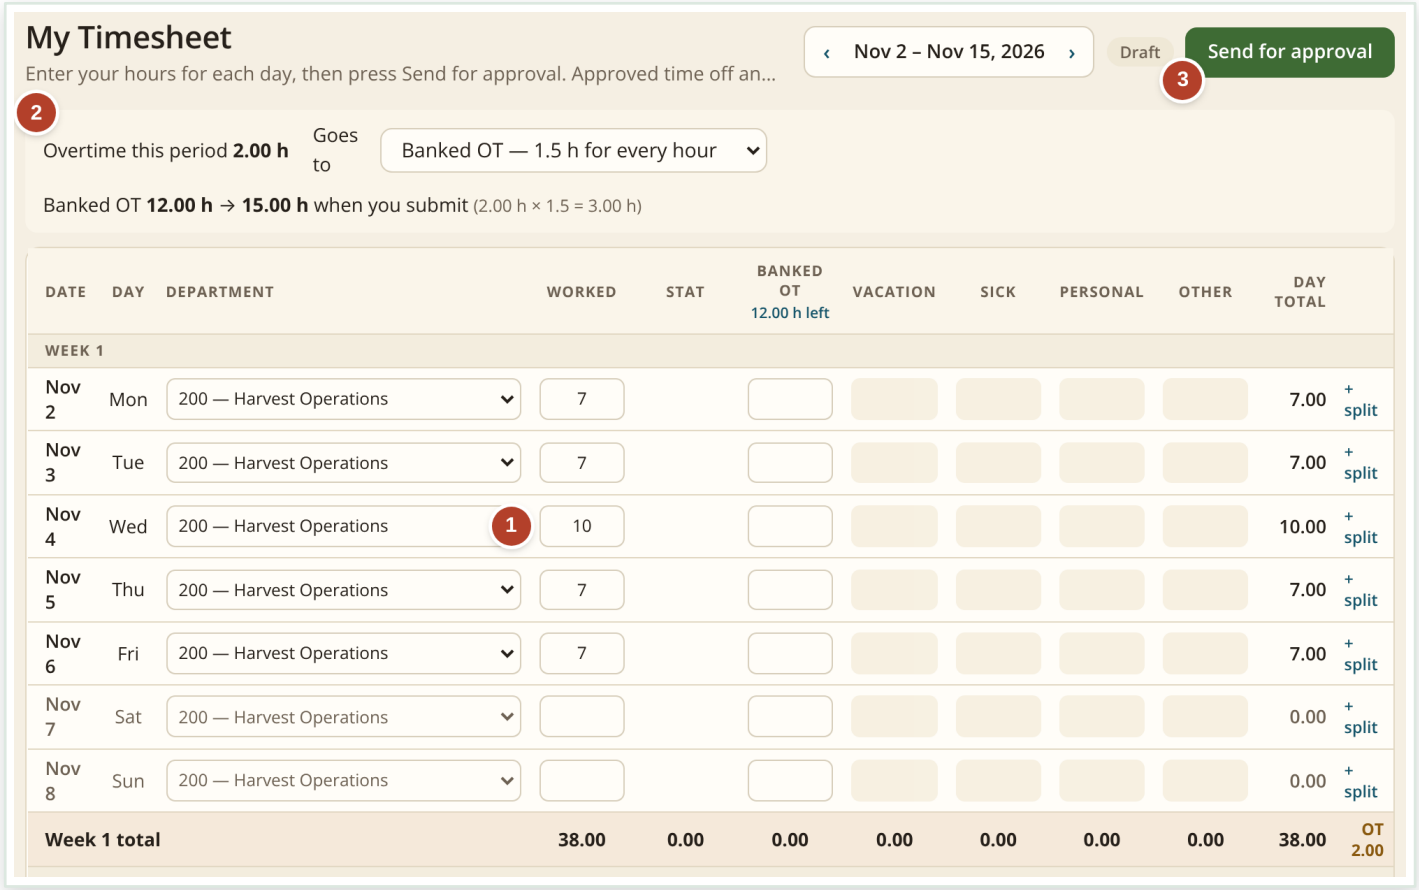

≈ 48 min
a month for each person, approvals included

$1,000
a month, with support within 48 hours

Own data
kept in one database that Nisla Naay owns

Admin time is an estimate for 50 staff; how it was worked out is on slide 14.

Timesheets: type the hours, the system does the math

Screen: My Timesheet, as an employee sees it.

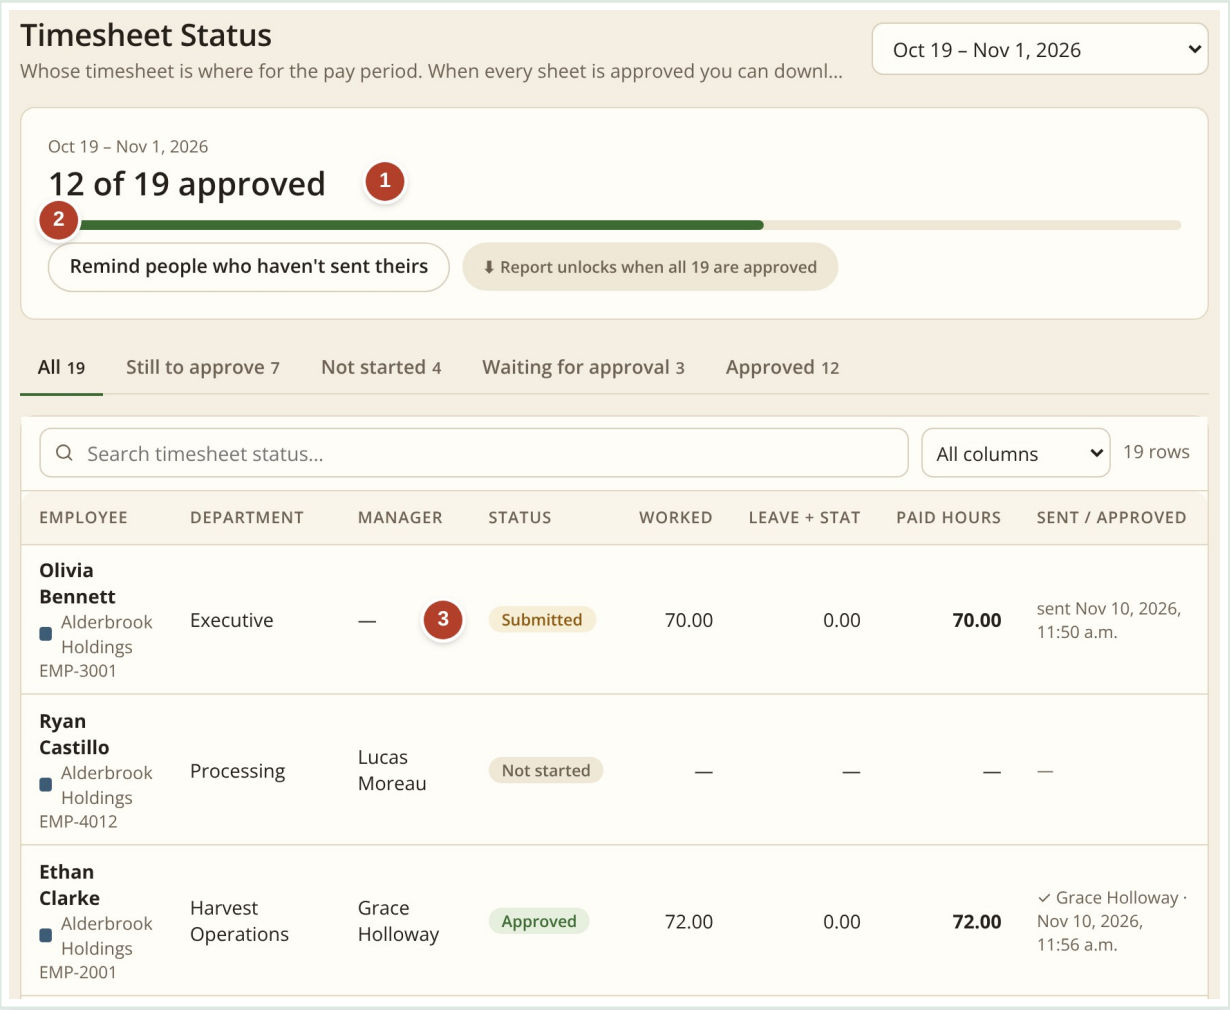

1 **Type the hours for each day**
Here a 10-hour Wednesday among 7-hour days.

2 **Overtime is worked out for you**
Banked at 1.5 hours for every hour, or paid: the employee chooses.

3 **One button sends it for approval**
The supervisor approves it on screen.

≈ 7 min admin time per timesheet

One page shows whose timesheet is missing

Screen: Time & Attendance › By pay period.

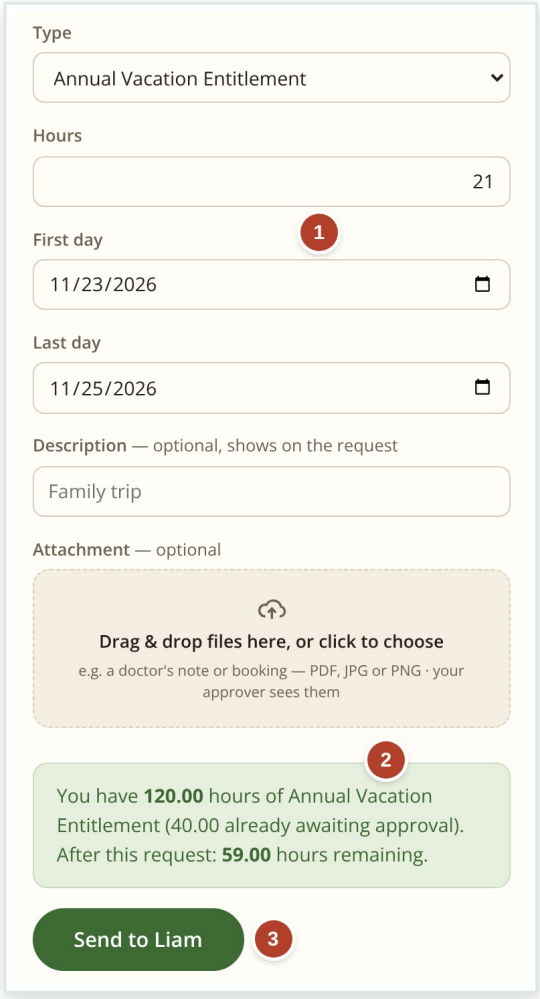

1 **Progress for the pay period**
How many timesheets are approved.

2 **One button reminds the rest**
Everyone who has not sent theirs gets a reminder.

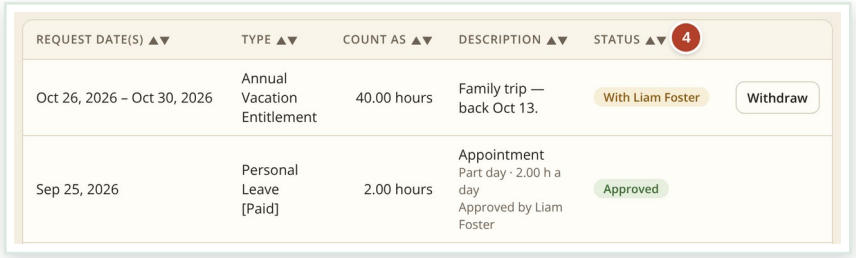

3 **Each person's status**
Not started, submitted or approved.

Ready for payroll on time. Approved hours, overtime and banked time go straight to the pay run.

Time off: one short form, approved in one click

Screen: My Time Off.

Balances are always right. Approved days fill the timesheet and the team calendar by themselves.

≈ 5 min admin time per request

1. **Pick the type and the days**
   The hours are worked out for you.
2. **See what is left first**
   The balance after this request, before it is sent.
3. **One button sends it**
   It goes straight to the supervisor.
4. **Follow the status**
   Who has it, and when it is approved.

Five kinds of request, each with its files and its history

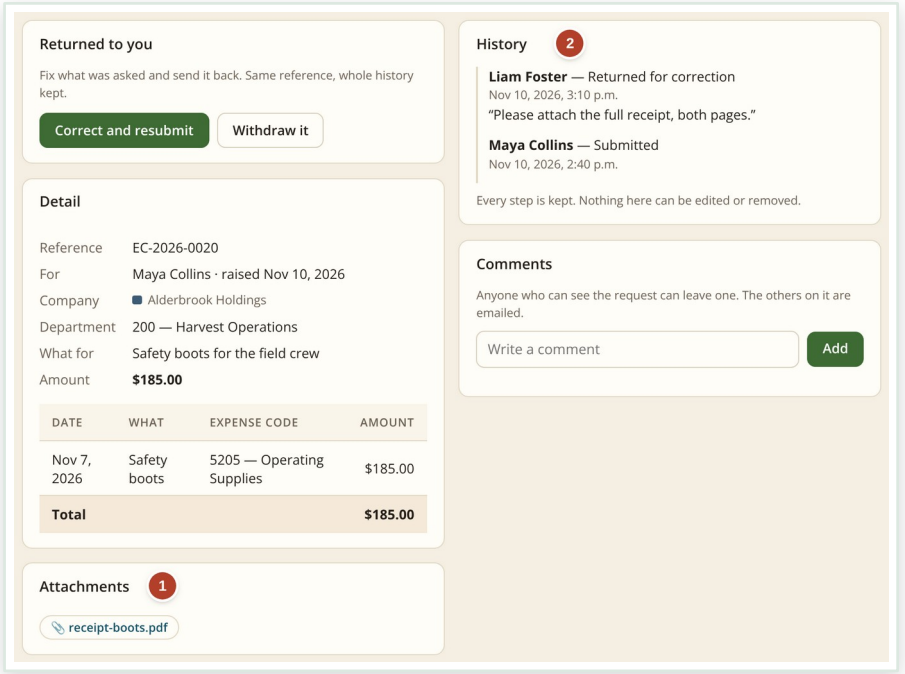

Travel request
Approval before a trip: where, when and the estimated cost.

Credit card purchase
Approval before buying on the organization's card.

Travel claim
Mileage, meals and other costs after a trip.

Expense claim
Money spent out of pocket, with the receipt.

Purchase order
Approval to order from a supplier.

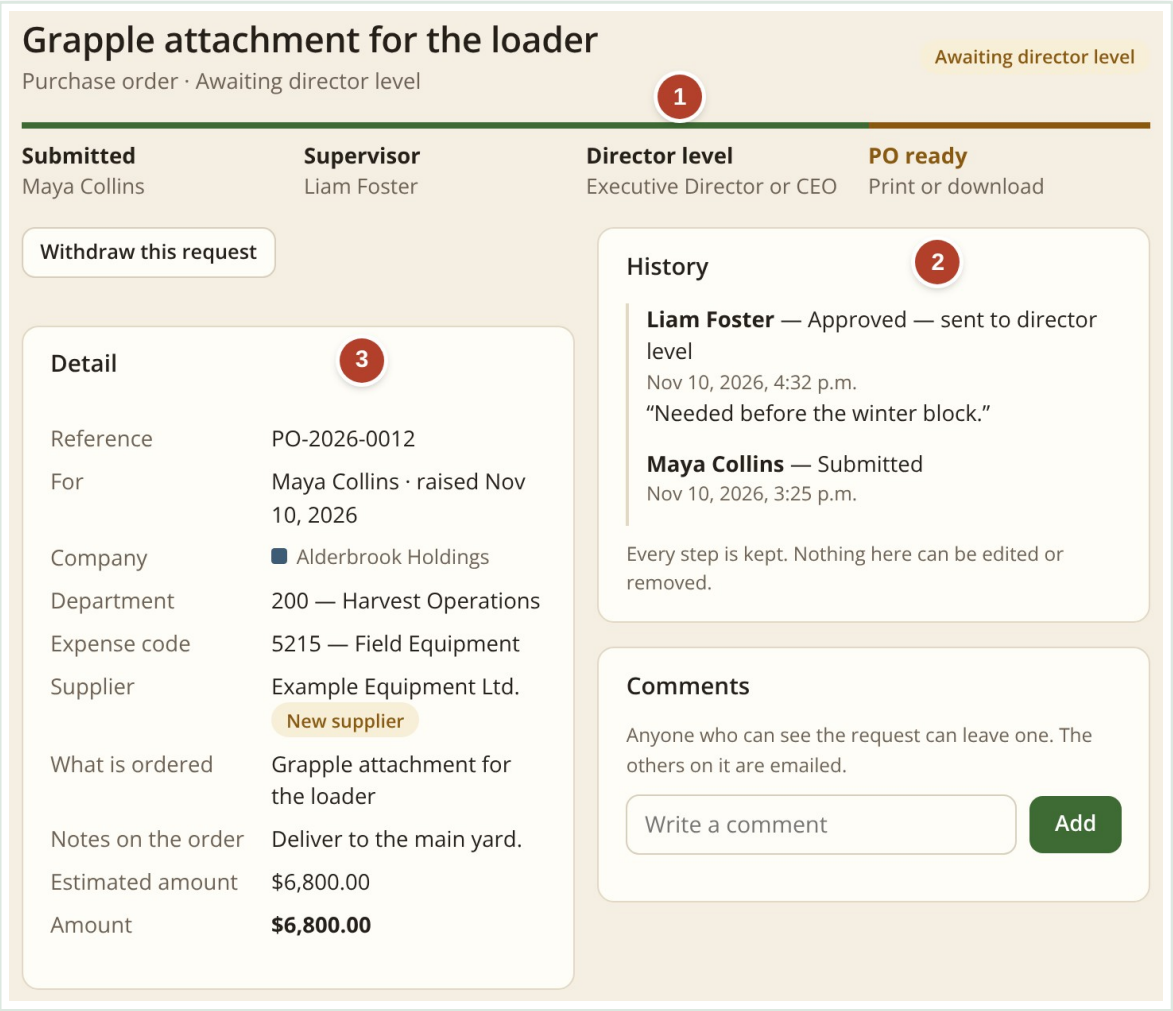

Screen: one expense claim opened.

1 Files attached
Receipts and quotes are added while filling in the request, and stay with it.

2 Its own history
Who sent it, who approved or returned it, when, and any comment.

A proper audit trail for every type. The request, its files and each approval are kept together under one number. Nothing can be edited or removed.

Every request shows its route and its history

Screen: one request opened. The bar shows the route.

1 The route
Who has approved and who is next.

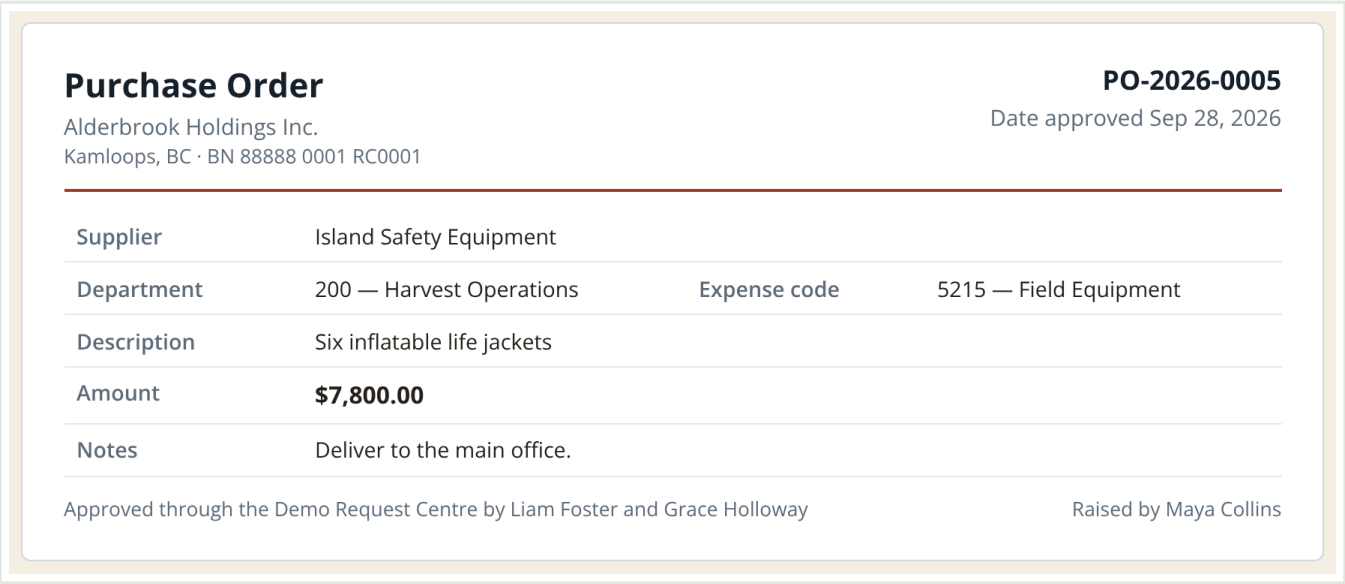

2 The history
Each step with name, date and comment.

3 The details
Department and expense code are required.

Nobody has to ask where a request is. The requester, the approvers and the people who process it all see the same page.

≈ 30 min admin time per request, all steps

Purchase orders: proper approval every time

Purchase Order

Alderbrook Holdings Inc.
Kamloops, BC · BN 88888 0001 RC0001

PO-2026-0005
Date approved Sep 28, 2026

Supplier	Island Safety Equipment		
Department	200 — Harvest Operations	Expense code	5215 — Field Equipment
Description	Six inflatable life jackets		
Amount	**$7,800.00**		
Notes	Deliver to the main office.		

Approved through the Demo Request Centre by Liam Foster and Grace Holloway

Raised by Maya Collins

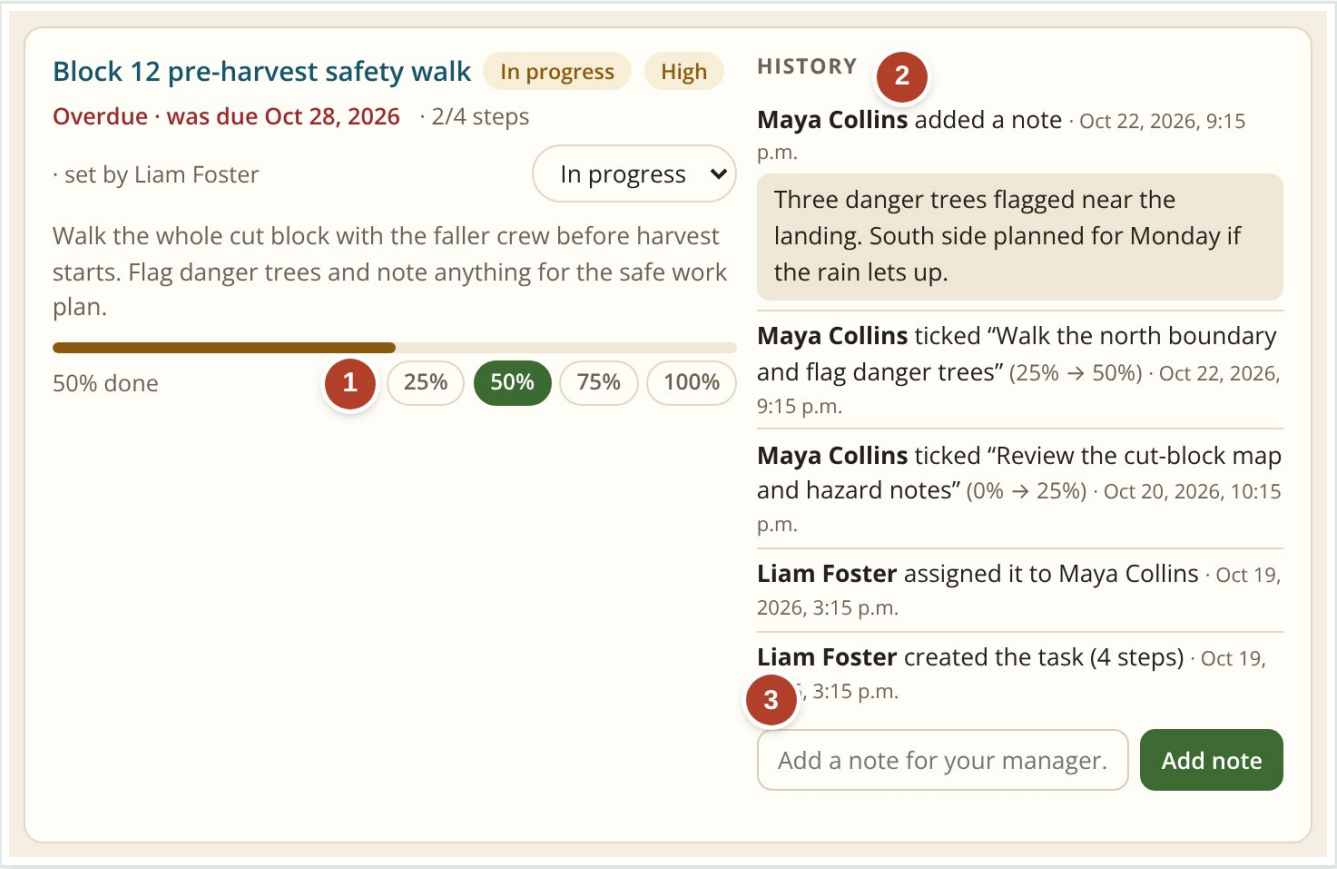

Screen: the one-page purchase order, ready to print or download as a PDF.

1. **Every PO has a number**
   One list shows where each one stands.
2. **No step can be skipped**
   Nobody approves their own order.
3. **The PO shows who approved it**
   The printed order always matches the approval.

Employee asks → Supervisor approves → Director level if over $5,000 → **PO is ready, with its number**

≈ 30 min admin time per purchase order

My Tasks: assigned, tracked and reported in one place

Screen: My Tasks. One task a manager assigned to an employee.

1 **Progress with one click**
25, 50, 75 or 100 percent.

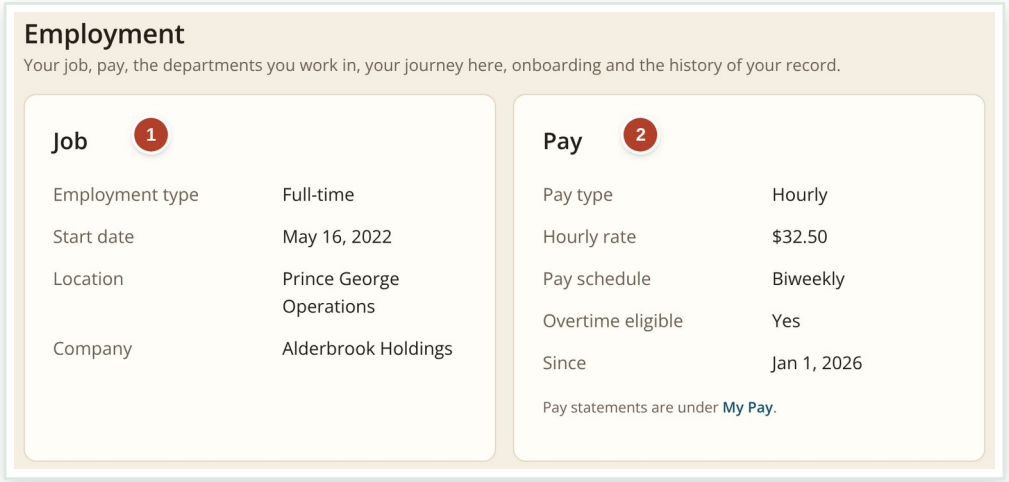

2 **The history**
Who did what, and when.

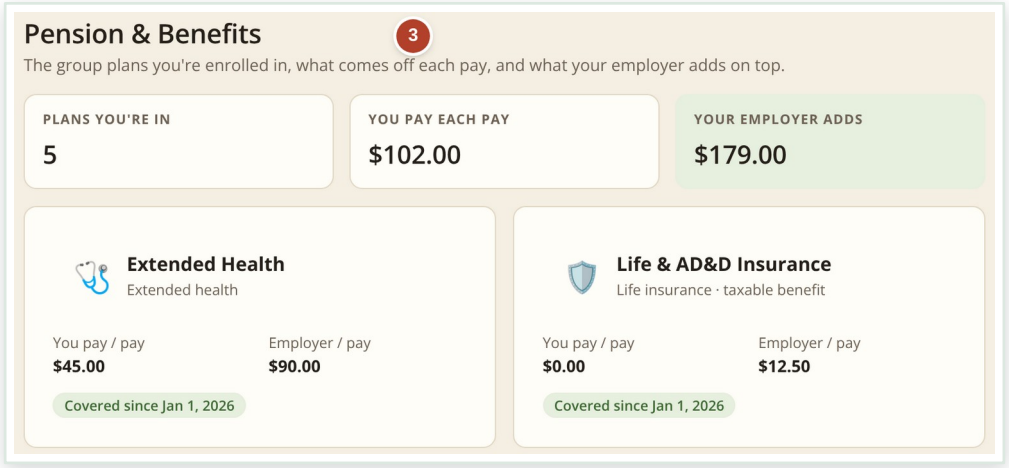

3 **A note for the manager**
Sent straight from the task.

A streamlined workflow and more productive teams. Everyone sees what is assigned, what is late and what is done.

≈ 5 min admin time per update

Staff check their own pay, job details and benefits

Screens: My Profile › Employment and Pension & Benefits.

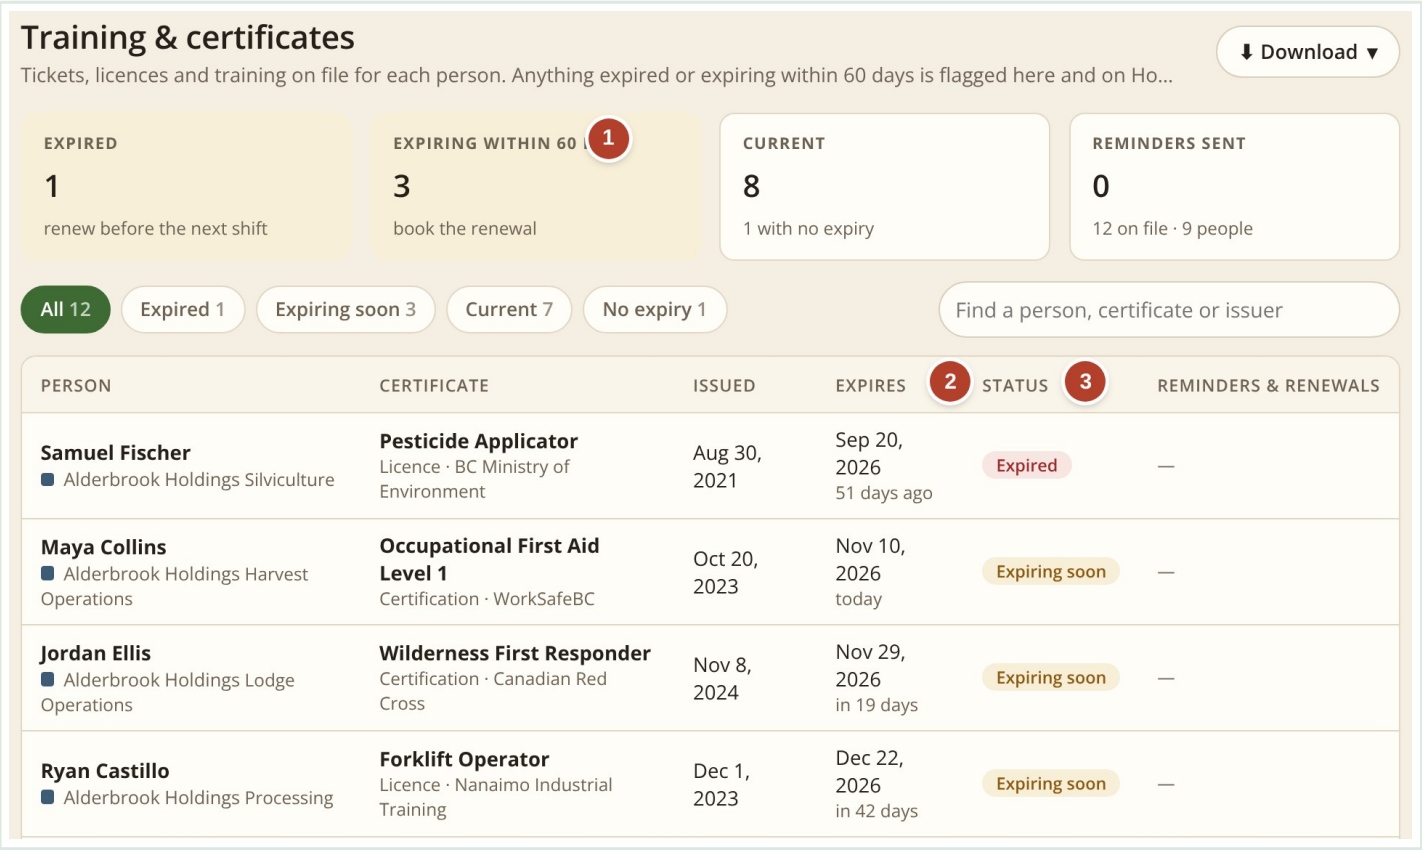

1 **Employment details**
Start date, position, location and who they report to.

2 **Pay details**
Pay rate, pay schedule and every pay statement, the moment it is ready.

3 **Pension and benefits**
The plans they are in, what comes off each pay and what the employer adds.

The answer is instant, at any time. Each person sees only their own record, and HR answers fewer routine questions.

Certificates: expiry dates tracked for managers and HR

Screen: People › Certificates, as a manager sees it.

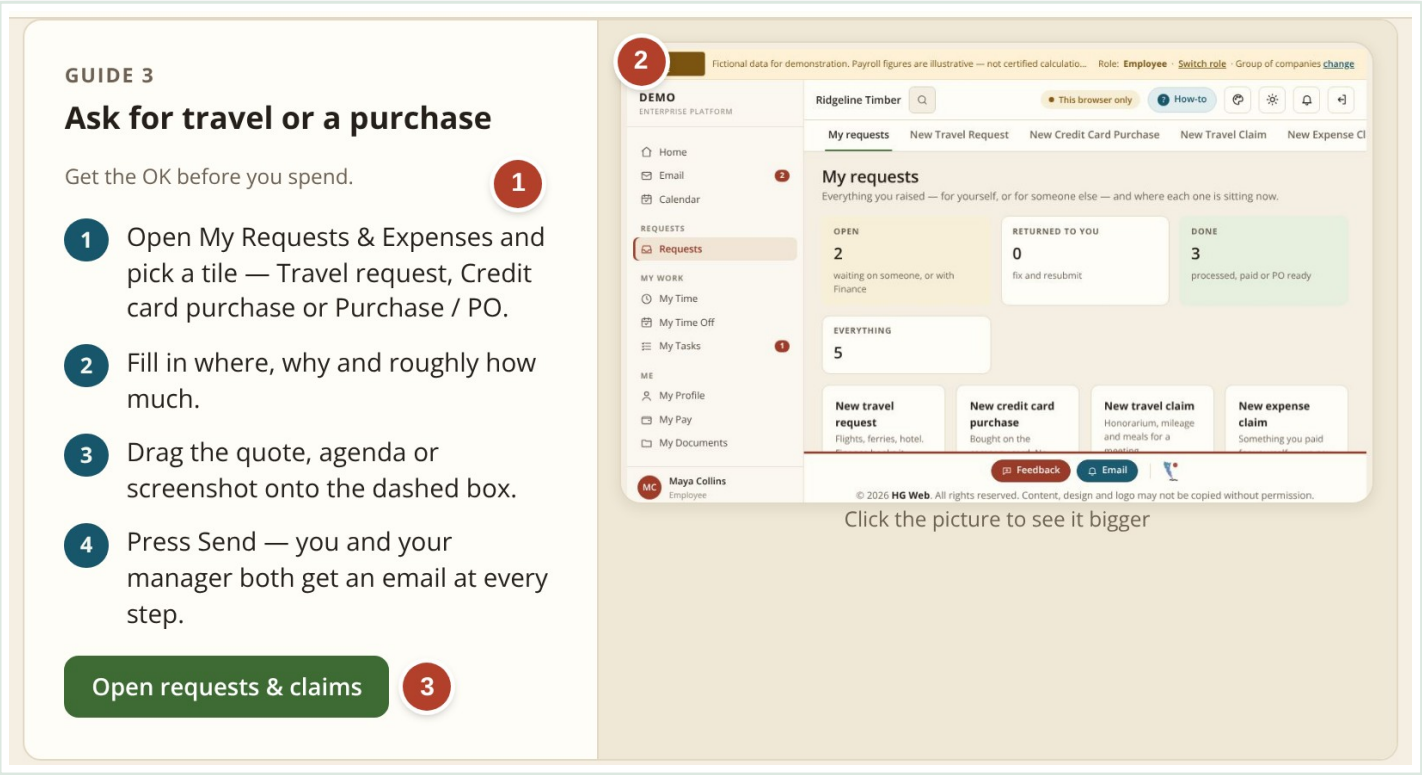

1 **What needs attention**
Expired, and expiring within 60 days.

2 **The expiry date**
With the days left for each one.

3 **A clear status**
Expired, expiring soon or current.

Nothing expires unnoticed. Managers see their own team. HR sees everyone, adds certificates and sends reminders.

Built-in How-to guides: new staff ready in about 2 weeks

Click the picture to see it bigger

Screen: How-to guides. One guide, as a new employee sees it.

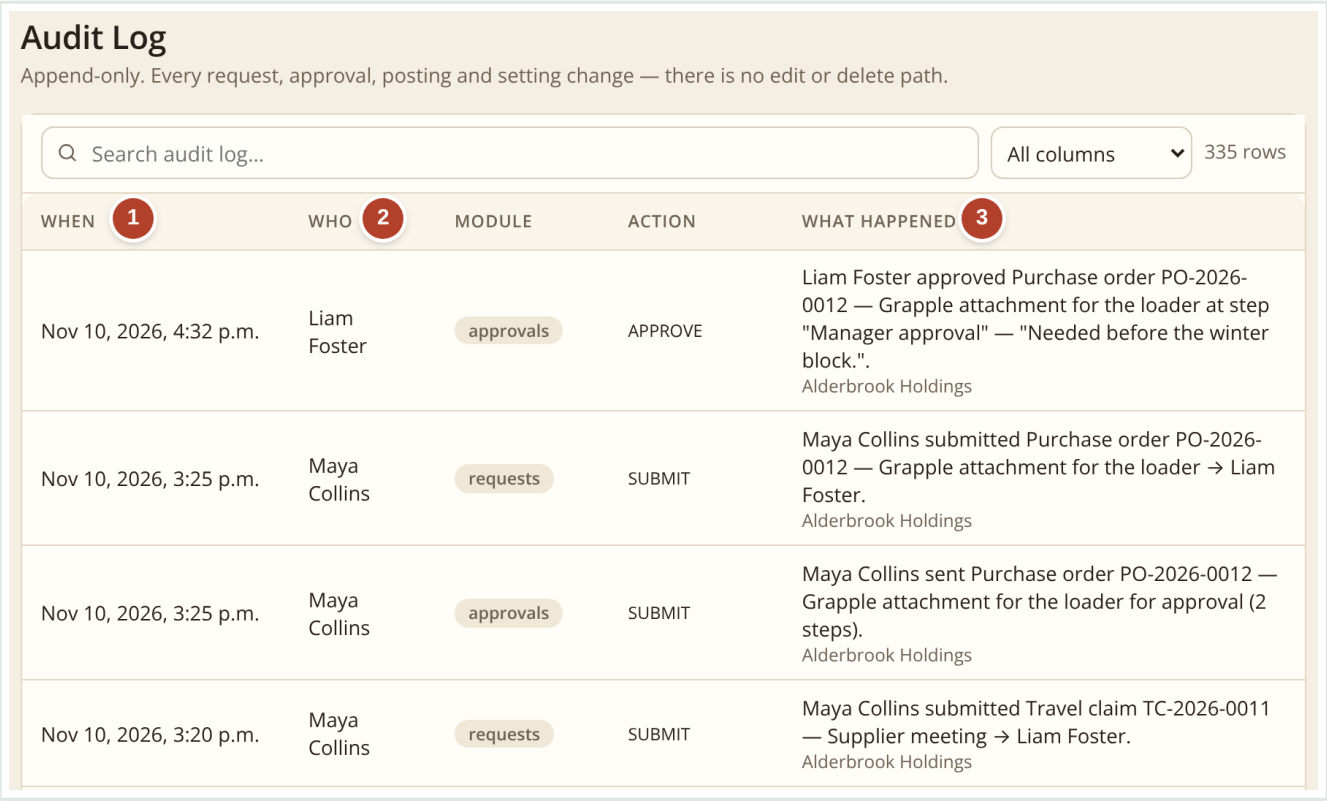

1 **The proper procedure, step by step**
Written in plain words, the same for everyone.

2 **A picture of the real screen**
So people know what to look for.

3 **One button opens the page**
Read the steps, then do the job.

New staff are ready in about 2 weeks. Guides are grouped by role: employee, manager, HR and more.

A proper audit trail, kept automatically

Audit Log

Append-only. Every request, approval, posting and setting change — there is no edit or delete path.

Screen: Administration › Audit log. One purchase order, step by step.

1 When
The date and time of every action, written the moment it happens.

2 Who
The person who did it, by name.

3 What happened
In plain words, with the request number, the step and any comment.

Nothing can be edited or deleted. One searchable record, ready for auditors and funders.

Admin time with the system: about 478 hours a year

Task	What it takes in the system	How many a year	Each	Hours a year
Timesheets	Type the hours, send; the supervisor approves on screen	1,300	7 min	**152 h**
Time-off requests	Pick the type and days, send; one click to approve	200	5 min	**17 h**
Requests and claims	Fill in, attach the receipt, approve, process	300	30 min	**150 h**
Purchase orders	Fill in, approve; the PO is produced with its number	120	30 min	**60 h**
Task updates	One click for progress, a short note for the manager	1,200	5 min	**100 h**
Total				**478 h**

≈ 48 min
a month for each person, approvals included

≈ 9 h
a week across the whole organization

How this was estimated

50 staff; a timesheet every two weeks; about 4 time-off requests, 6 requests or claims and 2–3 purchase orders a year per person; tasks updated about twice a month. Minutes include everyone who touches the item. All numbers can be changed in PowerPoint.

Your system, your data, your people

Nisla Naay’s own data storage

Records are kept in one central database that Nisla Naay owns and controls, hosted on its own servers or with a host in Canada.

No dependence on AI

The system runs on fixed, ordinary rules that people set. It needs no AI service to work, and no information is sent to one.

Fully customizable

Shaped to how the leadership team and employees work: the modules, the approval rules, the forms and the wording.

Local jobs, less outside dependence

More HR work can be done in-house, and new positions can be created for local people with proper training.

Pricing and timeline

MONTHLY PRICE

$1,000

a month

$12,000 a year once running

Monthly payments start only after the system is deployed to the whole organization.

What the price includes

- **The modules you choose**
  HR, Requests, Team and Operations; Finance customized to your finance team.
- **Support within 48 hours**
  Questions and fixes answered within two working days.
- **Fully customizable**
  Changed as the leadership team and employees need.
- **Your own data**
  Kept in one database Nisla Naay owns, hosted in Canada.

Weeks 1–2
Meetings with senior leaders, department managers and employees to gather requirements

Weeks 3–6
Implementation

Weeks 7–8
Trial in one or two departments

Then
Deployment to the whole organization. Monthly payments start here

Where we are, and what happens next

Today: a working prototype

Every screen in this briefing is real and can be tried in a browser, with fictional people and figures. A user manual comes with the demo link.

Time to go live

About 8 weeks: 2 weeks gathering requirements, 4 weeks of implementation, then a 2-week trial in one or two departments.

1. **Try the demo**
   Pick the modules you need on the first page and follow the user manual.
2. **Choose the modules**
   Decide which modules Nisla Naay needs first.
3. **Meet to gather requirements**
   Senior leaders, department managers and employees, in weeks 1 and 2.
4. **Trial, then go live**
   A trial in one or two departments, then the whole organization.
